P R E F A C E

THESE Indices are designed to facilitate the use of the facsimiles published by the New Palaeographical Society in the first ten years of its existence. They cover the 250 plates issued in the years 1903-12. The arrangement of the Indices is substantially the same as in the Indices issued by the Palaeographical Society in 1901, viz.: I. Chronological; II. Authors and Subjects; III. Country of Origin; IV. Character of Handwriting; V. Ornamentation; VI. Scribes and Artists; VII. Materials other than plain vellum; VIII. Present Owners; IX. Former Owners. To these has been added a concordance table for the use of subscribers who have had their plates bound according to the scheme suggested in the 'Table of Plates (classified)'. This is also printed on a loose sheet for insertion in the bound volumes.

Under the head of Present Owners one change has to be noted. The Oxyrhynchus Papyrus 668 has been allotted by the Egypt Exploration Fund to the British Museum, where it is numbered Pap. 1532. It will be found entered under both headings. The other corrections of any consequence which have so far been found necessary are recorded in the corrigenda slip issued with Part X, but two errors in the plate of monastic press-marks remain to be corrected. In pl. 147, no. 5, *for* Cistercians *read* Carmelites; and it has been pointed out by Dr. M. R. James that the press-mark in the same plate, no. 4 *a*, is probably that of Durham, not Norwich, Cathedral.
